

## Brainstorming for App Idea

### SOME ISSUES AND PROBLEMS TO SOLVE:

- Older people and less tech-savvy people don't have too much help with their technology. So making an app that is a forum where older people can ask their questions and get answers from younger people on the same app.

- For people who don't have access to a tv or channel to watch sports games, making an app that just shows the scores, and teams will benefit those people.

- For people that are maybe vegetarian, or vegan, or halal, there could be an app that shows recipes that don't contain any unwanted ingredients, based on your food and health conditions.

- Maybe there could be an app that shows your driver's license on an app virtually so that you don't need to take it with you everywhere.
- A Tips app that helps students manage their time and efficiency while working. The app will contain tips for better studying, a support page, a recommended timetable, and more. Perfect for students who are wanting to improve their study habits.

**I think the app that I will choose is the option that is the tips app that students can use to improve their studies and habits while maintaining a good schedule.**
